Scope of delivery

Acrylic glass sphere with plastic socket and VISATEC bayonet.

Technical data

Diameter 30 cm / 11.81 inches

Number of flashes With a cooled down Globo a continuous series of maximum 50 flashes (flash output 1200 J / 1200 Ws) with a modelling light of 150 W is permitted.

Compatibility

Monolights: LOGOS 800, LOGOS 1600. SOLO 400, SOLO 800 B,
SOLO 1600 B , SOLO 3200 B

Application

The area light with a 360° light angle is ideal for portraits and shooting interiors. Due to the characteristic of the light, unconventional light control is also possible.

Special features

To prevent overheating additional lamps must be located at a minimum distance of 1 meter away from the acrylic glass sphere.

A warm Globo must never be put down on its acrylic glass sphere, only on its socket.
